

Benefits Reconciliation

Detect discrepancies in employee benefit plan premium invoices by matching them against payroll, enrollment, and COBRA systems—saving time and preventing write-offs.

SAVE TIME AND ELIMINATE BENEFIT PREMIUM LEAKAGE

No More Spreadsheets

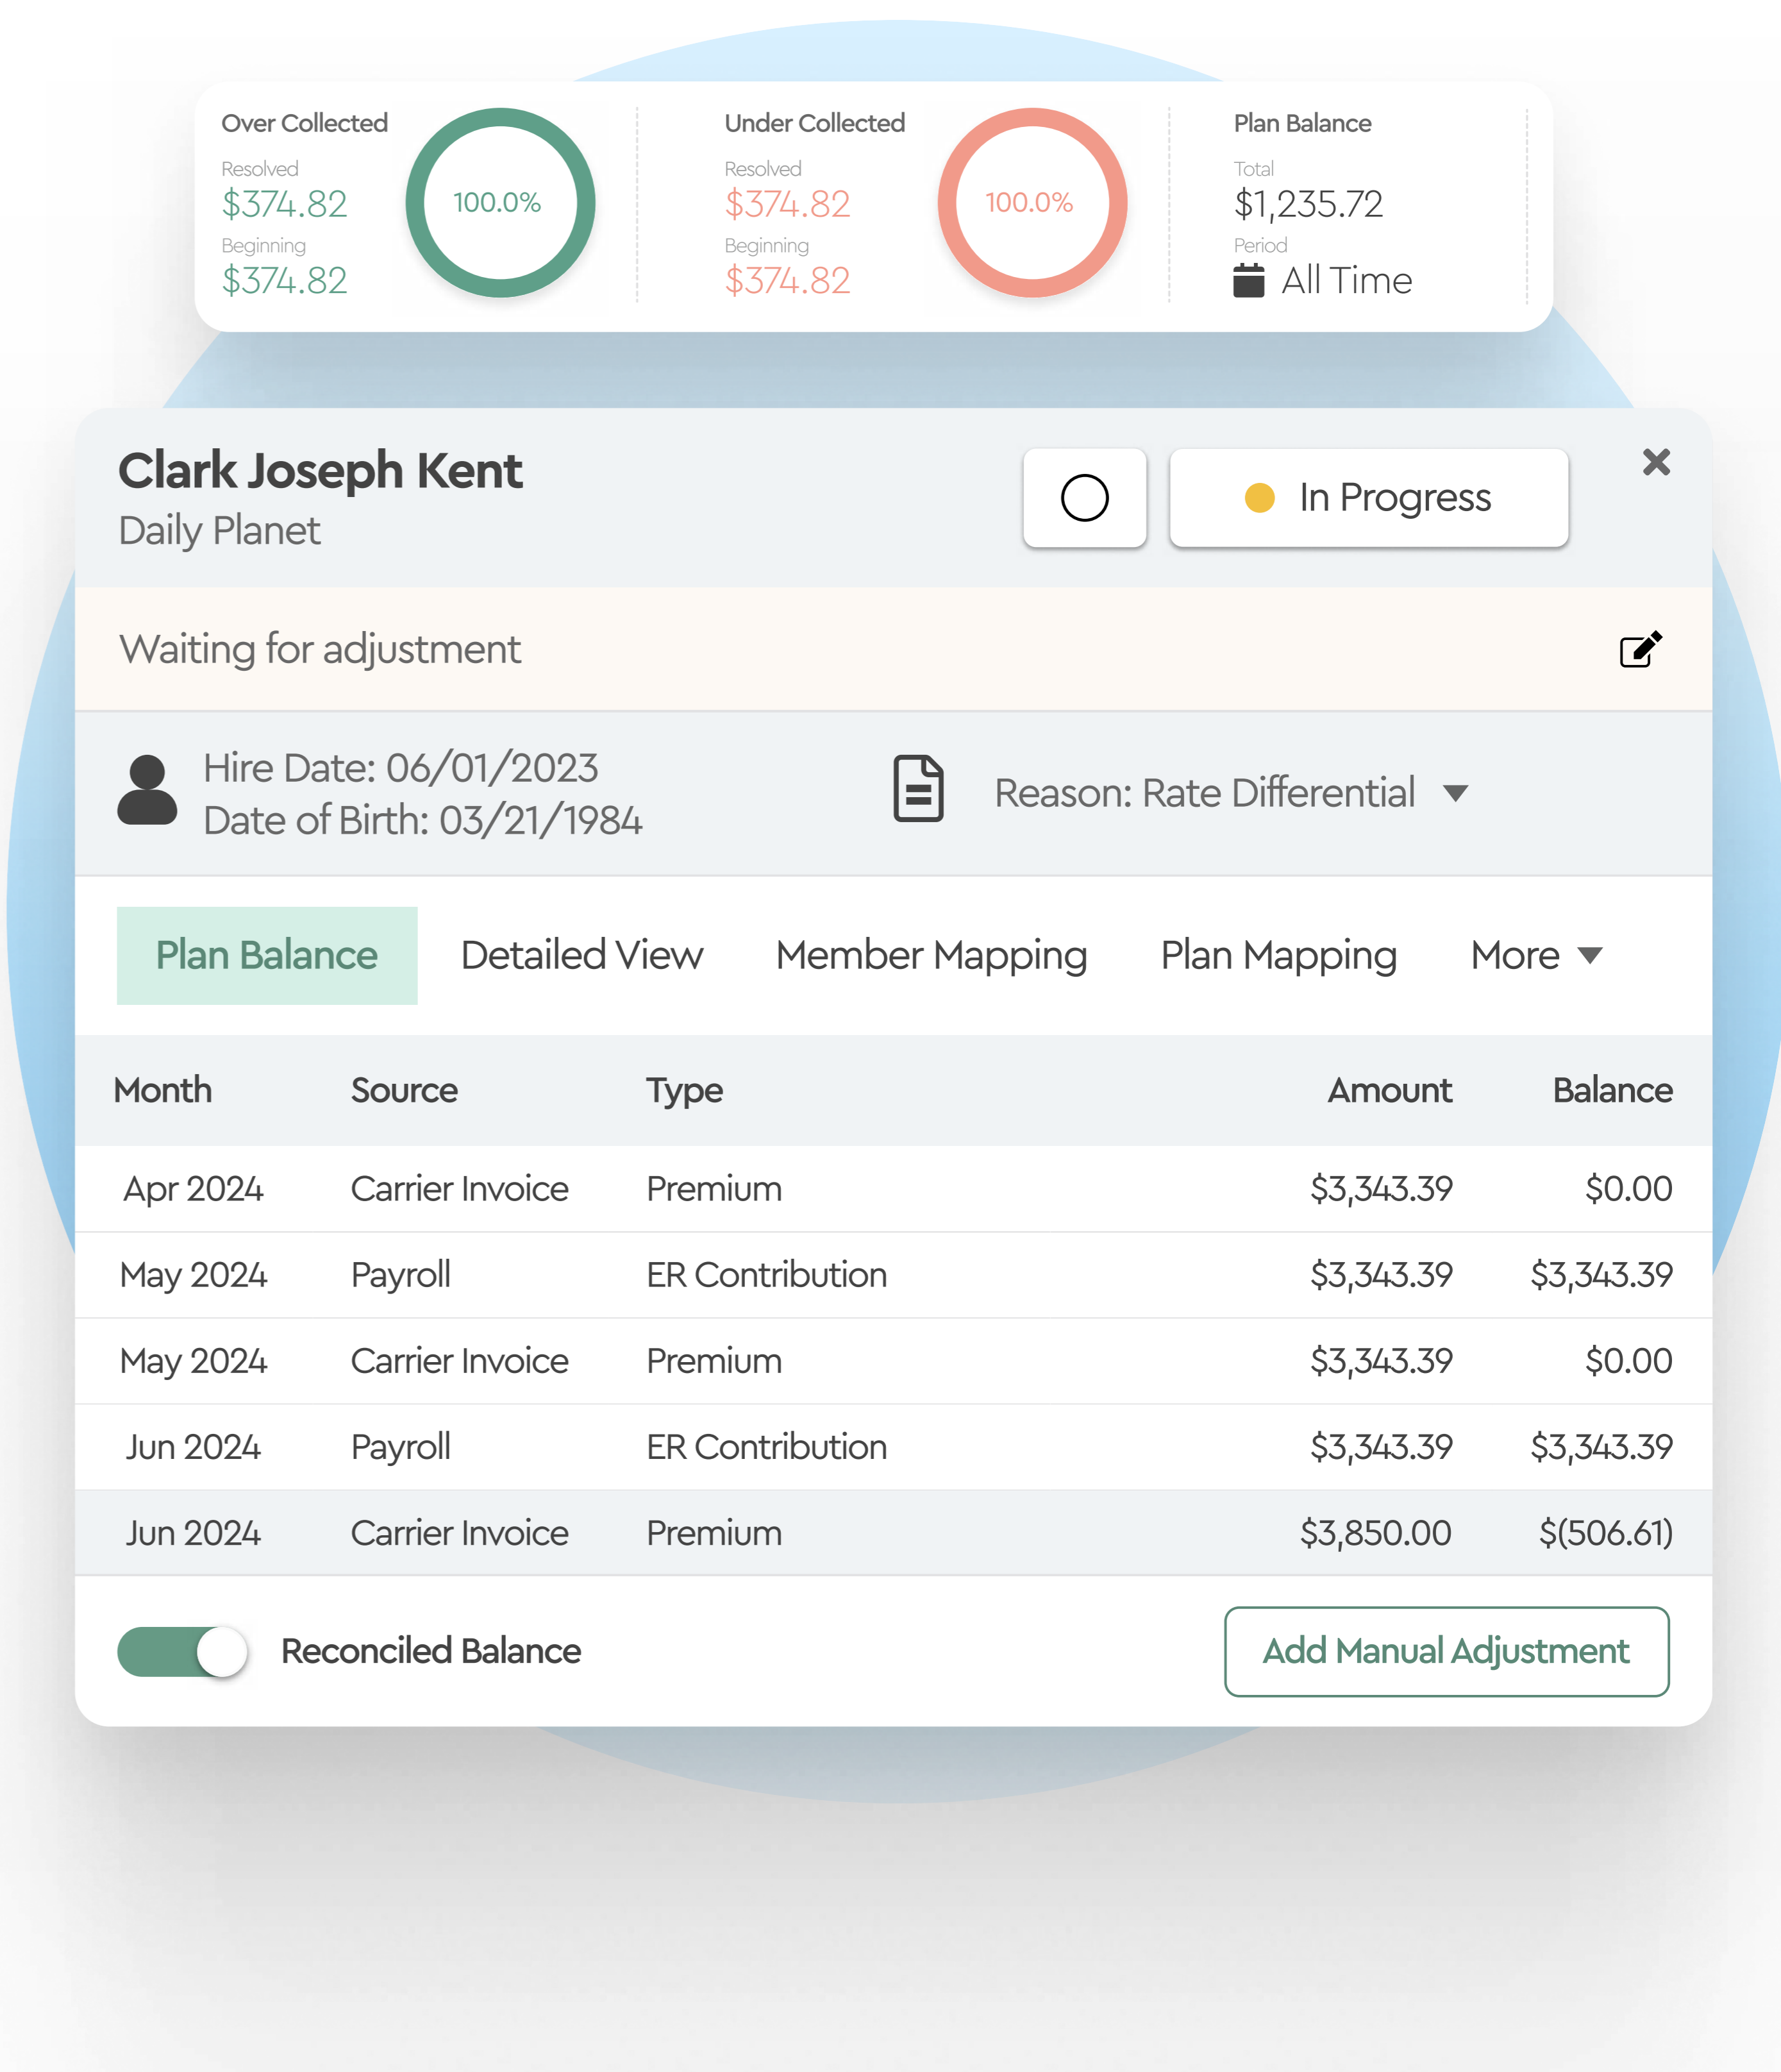

Excel's limitations include human error risk, poor version control, scalability issues, and weak data security for complex benefits reconciliation.

Streamlined Workflow

A simplified, repeatable workflow ensures consistency, boosts efficiency, and streamlines knowledge transfer—leading to reliable results and faster onboarding.

Audit Trail

Tabulera maintains a clear record of all changes made to data, promoting accountability and making it easier to trace and correct errors.
